REMARKS

Applicants' amendment dated September 21, 2007 responding to the July 30, 2007 Office Action provided in the rejection of claims 1-3, 5-9, and 26, the objection of claim 4, and the allowance of claims 10-25, wherein claims 1-3 have been canceled, claims 4, 6, 7, and 26 have been amended and no new claims have been added.

The Examiner withdraws the rejection of claim 26 under 35 U.S.C. § 112, 2nd paragraph corresponding to Applicants' amendment.

REASONS FOR ALLOWANCE

1. Claims **4-26** are allowed.
2. The following is an examiner's statement of reasons for allowance:

The cited prior art taken alone or in combination fails to teach the claimed invention of a method for allocating contributions toward a cooperative effort. Specifically, it is the combination of all limitations set forth in claims 1, 4, 10, and 17 and in particular, the limitation "N is equal to a product of $n(n-1)$ and a probability p, the probability p is less than 1."
3. The closest prior art of "Experimental implementation of a Quantum Game" by Carsten Schuck, July 22, 2003 teaches how the quantum version of a well known classical game, the prisoner's dilemma can be implemented, and further in view of "Multiplayer

Quantum Games” by Simon c. Benjamin et al, teaches the first study of quantum games with more than two players.

All of the above cited prior arts fail to teach or suggest “N is equal to a product of $n(n-1)$ and a probability p, the probability p is less than 1” as recited in claim 4 and claim 17.

To the extent that these features are not found in the prior art cited by Examiner, the present case is held allowable over the art of record.

4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”
